International filing date (day/month/year)

18.08.2003

IMPORTANT NOTIFICATION

Priority date (day/month/year)

28.08.2002

Applicant

CAMBRIDGE POSITIONING SYSTEMS LIMITED et al.

- 1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary examination report and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

EXAMINATION REPORT - SEPARATE SHEET

Re Item V

Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement.

Document(s) used in Examination Procedure: 1.

Reference is made to the following document(s):

D1: WO-A-0165271

Contribution over the Prior Art 2.

Document D1 is regarded as being the closest prior art to the subject-matter of 2.1 claim 1. The contribution above the prior art D1 is defined by steps (c)-(f) of claim 1.

The problem solved by these features is to determine the time of arrival of each of a number of signals arriving at a receiver. The solution to this problem is neither disclosed, nor rendered obvious by the teachings of any of the prior art on file. Thus an inventive contribution above the prior art can readily be acknowledged.

3. **Defects of the Application**

- The present claims do not meet the requirements of Article 6 PCT. Although claims 1, 14, 17, 18 have been drafted as separate independent claims. they appear to relate effectively to the same subject-matter and to differ from each other only with regard to the definition of the subject-matter for which protection is sought and in respect of the terminology used for the features of that subjectmatter. The aforementioned claims therefore lack conciseness. Moreover, lack of clarity of the claims as a whole arises, since the plurality of independent claims makes it difficult to determine the matter for which protection is sought, and places an undue burden on others seeking to establish the extent of the protection.
- Independent claims 1, 13, 30 and 31 are not in the two-part form in accordance 3.2 with Rule 6.3(b) PCT, which in the present case would be appropriate, with those features known in combination from the prior art (document D1) being placed in the preamble (Rule 6.3(b)(i) PCT) and with the remaining features being included

EXAMINATION REPORT - SEPARATE SHEET

in the characterising part (Rule 6.3(b)(ii) PCT). In the present case, steps (c)-(f) of claim 1 are considered to provide the contribution above D1, and, as such, should be placed in the "characterising part".

- The expression, "terminal section" has been employed in claim 1 and further claims. However, the first mention of such is within parentheses. Expressions contained in parentheses have, in general, no limiting function on the subjectmatter of a claim, and as such, cannot be considered as the antecedent to "the terminal section" as used on several instances.
- 3.4 According to Rule 6.2(a) PCT reference signs should be inserted in the claims to facilitate quicker understanding.
